Visual Studio Code interface showing a project named "activity2" with files: hello.class, hello.java, hello.py, and index.html. The main editor displays the content of index.html, which is an HTML document titled "Messed Up Code". The document contains a container with a welcome message, a paragraph with line breaks, a list of items, and a link to "https://example.com".

```
1 <!DOCTYPE html> <html lang="en">
2 <head>
3   <meta charset="UTF-8"><title>Messed Up Code</title>
4 </head>
5 <body>
6 <div class="container"      id="main-card" data-custom="value">
7   <h1>Welcome to the Chaos</h1>
8   <p>This is a paragraph with      terrible,
9 random spacing and inconsistent line breaks.</p>
10  <ul>
11    <li>Item 1</li>    <li>Item 2</li>
12    <li>Item 3</li>
13  </ul>
14  <a href='https://example.com' target="_blank" class="btn btn-primary" id="hero-link">
15    Click Me
16  </a>
17 </div>
18 <!-- nested mess -->
19 <div><div><div><p>Deep nesting on one line</p></div></div></div>
20 </body>
21 </html>
22
```

The terminal window shows the following commands and output:

```
PS C:\Users\Dell\pbwd> python -u "c:\Users\Dell\pbwd\activity2\hello.py"
Hello World
PS C:\Users\Dell\pbwd> cd "c:\Users\Dell\pbwd\activity2\" ; if ($?) { javac hello.java } ; if ($?) { java hello }
Error: Could not find or load main class hello
Caused by: java.lang.NoClassDefFoundError: hello (wrong name: activity2/hello)
PS C:\Users\Dell\pbwd\activity2> cd ..
PS C:\Users\Dell\pbwd> java activity2.hello
Hello World
PS C:\Users\Dell\pbwd>
```

The status bar at the bottom indicates the current file is index.html, line 9, column 49, with 4 spaces, UTF-8 encoding, and CRLF line endings. The interface also shows the Explorer, Outline, Timeline, Projects, Run Configuration, and Java Projects panels on the left, and the Output, Debug Console, and Ports panels on the right.
